Cardiac and Cardio: Open House Cancelled

A public open house at the new Cardiac Rehab and Cardiopulmonary Services facilities at Asante Rogue Regional Medical Center has been cancelled to avoid disrupting regular operation of the two units.

A public recognition of the two renovated spaces near the hospital's South Entrance had initially planned for May 29, but the event's necessity was later reconsidered. An Asante-only open house and tour was held on April 30.

Asante Cardiac Rehab and Cardiopulmonary Services relocated to space in the hospital's South Lobby Entrance area that was renovated in a construction project that began in early December. The two units have more than doubled their size, significantly increasing capacity for patient and member participation.

Both units reopened in their new spaces in April.

The expansion project allows Asante's Cardiac Rehabilitation team to enhance patient lifestyle, education and support programs. The Cardiac Rehab program is

directed by cardiologists and staffed by multidisciplinary teams. It includes individualized exercise prescriptions and monitoring, extensive education for both patients and their families, and emotional support.

The renovation has also enabled easy patient access, with drive-through drop-offs at the South Entrance Lobby, and streamlined registration. The open floor plan includes two private intake rooms, a dedicated waiting area, new furniture and state-of-the-art exercise equipment and technology.
